Subject: Microsoft Settlement

Microsoft has been has helped the US & other countries to emerge into world leading companies. Netscape & CEO James Barksdale was bundling features years ago & was upset with Microsoft turning the tables on them when Mr. Barksdale conceded engaging in in simular practices & stating He didn t recall. Soon after Netscape merged with another company. Who was calling the kettle black? During the 1940 s U.S. Steel went through similar litigation & settled with- out killing the company as Judge T.P. Jackson was trying to do to Microsoft. Who incidentally was not qualified to make this decision. I believe this company has suffered and paid more than their share through unreasonable and excessive charges. The US has encouraged innovation competition & development of technologies. This built our country and made us strong to prevent any Bleeding Hearts to damage and hurt us such as the Ben Laden s. If anyone was wielding a club in these negotiations it was Apple not Microsoft. Will AOL be next? What about the merger between AOL and Time Warner? This changed the competition land-scape in one of the most competitive industry in the world. I think it is time to reflect and close the litigation against Microsoft before the Bleeding Hearts close one of our leading companies in our nation.
